

# Duckback Products

## **Attention Prefinishers:**

Effective immediately, Duckback Products no longer recommends the use of Mason's Select Woodperfect Semi-Transparent Coating on any James Hardie Fiber Cement products. It has come to our attention that the current James Hardie factory primer does not adequately resist UV rays when used with our Woodperfect Semi-Transparent Coating. This recommendation only applies to James Hardie Products and no other fiber cement manufacturers.

If you have any questions or concerns please contact Duckback Products at 800-825-5382.

Thank you,

Duckback Products
